

TRACCESS™ CI is a powerful software application that allows you to track, manage, and report on employee learning and ensure employees are competent, compliant, and in line with your corporate strategy. TRACCESS™ CI gives employees ownership of their own learning and helps minimize supervisor tasks.

Employees can use TRACCESS™ CI to view their personal learning plans, access learning resources, and completed and incomplete tasks, as well as tasks that may need to be updated or re-certified. Supervisors can monitor competency and compliance quickly and can be notified when an employee is not competent or when they need to be re-certified.

Another great benefit of TRACCESS™ CI is the tracking and compliance protection that it offers. Now, with the addition of Capability Assessments, we have increased your corporate safety-net.

TRACCESS™ CI Features

- Employees can take ownership of their own learning which minimizes supervisor tasks
- Provides employees with resources to help them perform tasks to standard
- Allows employees to evaluate their knowledge levels by taking self assessments
- Provides employees with final assessments to prove their competency
