

Strategic Procurement and Supply Management in the Oil and Gas Industry - SC-62

COURSE

About the Course

The development and implementation of carefully crafted strategies for the procurement of all goods, equipment, materials, and services has become a critical issue for all those in the oil and gas industry wishing to reduce operating cost while improving quality and productivity. This program explores key concepts forming the basis of strategic supply management, and moves today's supply management organization from its typical tactical focus to the strategic focus needed to successfully implement the processes and methods needed to reach world-class performance.

"This was the best course I have attended." - Procurement Officer, Pakistan

"All subjects were sufficiently described and detailed." - Procurement Advisor, Iraq

Target Audience

Managers and professionals in supply management, procurement, purchasing, contracts, materials, inventory control, projects, maintenance, operations, finance, as well as all other professionals interested in lowering total cost and increasing productivity and profit contributions from better supply management operations.
