

Existing Power Generation Technologies with Alternative Energies

MODULE

About the Skill Module

This skill module covers the following topics:

- Coal, Oil, Gas Traditional Power Generation, Integrated Gas Turbine Combined Cycle
- Hydroelectric Nuclear Power Generation, Generation I, II, III, IV
- Nuclear Safety
- Geothermal
- Ocean Mechanical, Thermal

See demo online learning module

Target Audience

This course is useful for senior and middle management and for anyone involved in the integration of low carbon power generation technologies into existing and future infrastructure.

You Will Learn

You will learn how to:

- List the various power production alternatives
- · Describe traditional power generation techniques
- · Describe turbines and boilers
- Describe waste heat recovery processes

Product Details

Categories: <u>Energy Transition</u>

Disciplines: Net Zero & Renewables Multi-Discipline Training

Levels: Basic

Product Type: Individual Skill Module

Format: On-Demand

Duration: 2 hours (approx.)

\$250.00
